Java Script Day S

Lecture (4>>

Hn array is a contiguous space of elements that can Store Values

ar example

Var arr=[]; → Empty array Var arr=[n,m, 7, 3];

Var arr = [1, true, 3.141592, "+ext", Ename: luieong23,];

arr. length

arr [i]; -> location

«Lecture 15>>

Using Array - element 37H/5x11

unshift - Insert -> puch Shift - Delete -> Pop

Pop push shift Unshift

Var arr = [1.2.3.4.5];

arr. pop();

HMESOLEMANT OFFICE CENTER PERUTA

arr.shift();

मानुरा क्षाम ज्यावह क्षाक्षिकाम

Orr. push (element);

भार्विव सिमा भीयवाह नेन

arr. unshift (element); the election of 2101 = 37+

Using Array: Etc

arr. neverse(); → 呼吸 returnarr. Sort(); → 对结析

Using Array - 붙이기 검색하기

(arr1. Concat (arr2);

arra = arr.1. concat (arr2);

. Index of (element) -> location

- last Index of Celement) + last (acation

.Sp(i+ (",");

Lecture 16>>> : 245].
